

Custom panel production

IPS Custom Panel Production is a CSA/UL-Certified panel shop. We offer design, fabrication, programming, installation, start-up and service of control panels for industrial and commercial applications.

We build control panels to spec. IPS engineers and technicians provide turnkey solutions, with hardware and components, custom programming and back panel layout. We test all panels before shipping.

Our panel specialists also provide on-site trouble shooting, system retrofits and upgrades, preventive maintenance and emergency repairs.

Services:

- ✓ Engineered control solutions
- ✓ VFD cabinets
- ✓ Control consoles
- ✓ Junction boxes
- ✓ Power distribution
- ✓ Lighting, UPS and emergency power control
- ✓ PLC/HMI digital control

Custom panel design and production for these industries:

- ✓ Aerospace

- ✓ Food & Beverage
- ✓ Forestry
- ✓ Metal fabrication
- ✓ Mining
- ✓ Power generation
- ✓ Water treatment

Don't see your industry?

Talk to your IPS regional sales representative to discuss what we can do for your operations.

IPS's in-house panel shop is both UL and CSA certified.

Control panel design, build, on-site service and engineering support

IPS field service technicians provide on-site troubleshooting, with system retrofits and upgrades.

We specialize in preventive maintenance and emergency panel repairs, with skilled veteran technicians backed by IPS engineering.

IPS offers on-site testing, commissioning and start-up of control panels.

IPS engineering can help modify control panel operations for specific requirements.

The IPS advantage

IPS supports plant reliability with veteran technicians, using state-of-the-art equipment and backed by our engineering corps. Make sure your control panels deliver the reliability you expect from IPS-serviced motors, generators and mechanical components.
